

Burton Wold Wind Farm

Project Facts

Burton Wold Wind Farm is Northamptonshire's first Wind Farm, and England's largest wind farm - consisting of 10 turbines.

In the last year the ten turbines have produced clean, renewable electricity equivalent to the needs of over 8,300 homes¹

The turbines are supplied by Enercon GmbH, one of the leading wind turbine manufacturers in the world. The Enercon E70 model has a 2 Megawatt capacity, is 64 metres to the hub and has a 71 metre rotor blade diameter, giving a 99.5 metre tip height.

The project was developed by Your Energy Ltd, is owned by Mistral Windfarms and operated by Windfarm Management Ltd – companies all operating under the Mistral Group. E.ON UK is buying the electricity output of the project under a long term power purchase contract.

The Mistral Group are advised by Platina Finance Ltd, who are authorised and regulated by the FSA.

The Community

- Approximately £290,000 will go towards energy efficiency and education projects over the life of the wind farm. Yeomans Court Sheltered Housing have installed solar panels through the fund, and future projects include a community information point for residents and visitors alike to learn about the wind farm and energy efficiency. This fund is being administered by the Kettering Borough Council. Please contact Chris Stopford for more information, phone: 01536 534280 or email: chrisstopford@kettering.gov.uk
- The wind farm has hosted visits to over 400 children from local primary schools and over 200 people have been given a tour of the wind farm to learn about how wind energy works.
- Shortlisted from over 30 nominations to be recognised as an outstanding renewable energy development by the Renewable Energy Association.
